

# Phillip Harris

☎ (630) 430 4670 · ✉ plharris@wisc.edu · 🌐 phillipharris

INTERESTS	I study analytic number theory at the University of Wisconsin. My advisor is Simon Marshall. I also work in formal methods and programming language theory.	
EDUCATION	<b>University of Wisconsin</b>	Madison, WI
	Ph.D. in Mathematics	2019 – Present
	<b>University of Illinois at Urbana-Champaign</b>	Urbana, IL
	Bachelor of Science in Mathematics & Computer Science Coursework includes A+ in CS 374 (Algorithms), A/A+ in 10 graduate math courses, including theory of PDE's, functional analysis, 3 courses in combinatorics and number theory topics	2014 – 2018
	William Lowell Putnam Competition: Top 10% nationwide	2015
PUBLICATIONS	<ul style="list-style-type: none"><li>• <i>Random Nilpotent Groups of Maximal Step</i>. Harris, Phillip. (Accepted, New York Journal of Mathematics)</li><li>• <i>Average Frobenius Distributions in Short Intervals</i>. A. Agwu, P. Harris, S. Kannan, K. James, H. Li. (Accepted, Ramanujan Journal)</li><li>• <i>Frobenius Distributions in Short Intervals for CM Elliptic Curves</i>. A. Agwu, P. Harris, S. Kannan, K. James, H. Li. Journal of Number Theory, Volume 188, 263-280, 2018</li></ul>	
TALKS	<ul style="list-style-type: none"><li>• "Integrals of Eigenfunctions over Geodesics" @ UW Grad Analysis Seminar</li></ul>	
EXPERIENCE	<b>University of Wisconsin</b>	Madison, WI
	Research Assistant	Spring 2022
	Teaching Assistant	2019 – 2021
	– MATH 221 Calculus and Analytic Geometry (Fall 2019, Spring 2020, Spring 2021, Fall 2021)	
	– MATH 240 Introduction to Discrete Mathematics (Fall 2020)	
	<b>Onai</b>	Palo Alto, CA
	Contractor	Summer 2020
	<ul style="list-style-type: none"><li>• Developed a formally verified state transition model for distributed computation in Idris. <a href="https://www.onai.com/">https://www.onai.com/</a></li></ul>	
	<b>Runtime Verification</b>	Urbana, IL
	Haskell Engineer	2018 – 2019
	<ul style="list-style-type: none"><li>• Implemented SMT solver integration, automated theorem proving, and symbolic execution functionality for the new <math>\mathbb{K}</math> language backend: <a href="https://github.com/kframework/kore">https://github.com/kframework/kore</a>.</li><li>• <math>\mathbb{K}</math> is a framework for formal verification of programs using rewriting logic semantics. For more information see: <a href="http://www.kframework.org/index.php/Main_Page">http://www.kframework.org/index.php/Main_Page</a>.</li></ul>	
	<b>Clemson University</b>	Clemson, SC
	Student Researcher	Summer 2017
	Under Prof Kevin James, studied the distribution of the trace of Frobenius $a_p$ of CM and non-CM elliptic curves. Work resulted in two papers.	
CODING	<b>Google Code Jam</b>	2014
	<ul style="list-style-type: none"><li>• Top 1,000 out of 20,000+ contestants</li><li>• Used Haskell, C++</li></ul>	
	<b>Languages</b> Haskell, C/C++, Java, Rust, Python, Idris, Agda, R, $\text{\LaTeX}$ , Javascript, Nix <b>Tools</b> Vim, Git, macOS, Linux, Mathematica
